this manual contains fully worked out solutions to all of the odd numbered exercises in the text giving students a way to check their answers and ensure that they took the correct steps to arrive at an answer

intended for the one or two term algebra based course in statistical methods this innovative book takes full advantage of the computer both as a computational and as an analytical tool the focus is on a serious analysis of real case studies on strategies and tools of modern statistical data analysis on the interplay of statistics and scientific learning and on the communication of results

introduction to quantitative research methods is a student friendly introduction to quantitative research methods and basic statistics it uses a detective theme throughout the text to show how quantitative methods have been used to solve real life problems the book focuses on principles and techniques that are appropriate to introductory level courses in media psychology and sociology examples and illustrations are drawn from historical and contemporary research in the social sciences the original cd rom accompanying the book and its content are no longer available

the first edition of fundamentals of cartography was published in 1969 by prasaranga university of mysore it was reprinted by the concept publishing company new delhi in while the book remained in currency the cartographic processes changed drastically when information technology brought a sea of change in the sources of information drafting of maps and printing processes drawing maps by hand became obsolete surveying whether ground or aerial was no longer the only major source of information in view of these changes it became necessary to bring out a new edition realising that unless one knows directions scales projections coordinates ground and air surveys one would fail to understand the proper use of modern information technology in the drawing the maps thus the contents of 1969 edition are retained and new chapters have been added to update the book in part ii of the book a chapter on remote sensing and satellite imageries has been added and part v contains chapters on computer aided cartography geographic information system gis land information system lis and global positioning system gps

statistics for management and economics is the worldwide best selling business statistics text it is currently being used at hundreds of colleges and universities throughout the world this text teaches students how to apply statistics

to real business problems through the authors unique three step approach to problem solving students learn to identify the right technique by focusing on the relationship between the problem and data type they then learn to compute the answer either by hand using excel or using minitab finally they interpret the results in the context of the problem this approach enhances student comprehension as well as practical skills and offers maximum flexibility to instructors wishing to teach concepts by hand or with the computer or by using both hand and computer methods

a recent survey showed that for every student taking a statistics course in a statistics department more than three take such a course in a mathematics department but many math departments have no statistician on staff this instructor s manual was originally intended as a companion volume to math teacher workshops that addressed the issue but it may also be helpful to experienced teachers of statistics at the undergraduate or secondary level it includes classic and original articles on various aspects of statistical education as well as descriptions of innovative projects the text has no subject index c book news inc

in the construction industry hispanics have the highest rate of fatal work injuries among the racial ethnic groups and productivity in the field is limited by the language barrier between hispanic workers and their supervisors and the level of education of many hispanic craft workers this research developed a training program designed to facilitate the integration process between american supervisors and hispanic craft workers in a practical and cost effective way thus improving productivity and lowering fatality rates the iowa state university research team conducted a survey of 38 american supervisors representing 14 iowa construction companies survey results confirm that communication is the main problem experienced by american supervisors in the job site many american supervisors also use or depend on a link person an individual who interprets tasks to the rest of the hispanic crew to communicate to the hispanic crew members research findings show that language differences affect productivity and workplace safety in the construction industry additionally the educational levels of hispanic workers indicate that they may not have the literacy skills necessary to understand training materials this research developed two training courses designed to expand the spanish communication skills of american supervisors the research team modified the english as a second language course developed in phase i into the spanish as a second language ssl survival course a series of technical training courses were also developed titled concrete pavement construction basics cpcb that cover general practices

in concrete pavement construction they are much shorter and more specialized than the ssl course the cpcb courses provide american supervisors simple and practical communication tools on a variety of topics to choose from according to their specific needs
